Mitra · test questionnaire English + ಕನ್ನಡ

For manual testing on web and phone. Expected numbers were read from the live database on **22 Oct 2026, 16:57**; they move by a few as new cases are filed, so a small difference is fine. Every data answer must come with a picture; 'how is X doing' must open the full board of six cards with a scope chip. Use the Chief Secretary profile for sections 1, 2 and 4.

4 · What counts as a pass

- The number spoken or drawn matches the expected one (within a few, as cases get filed).
- A data answer always shows a picture; 'how is X doing' shows the board of six cards.
- Departments outside Revenue, RDPR and Food are answered from the iPGRS sample week, and Mitra says so.
- Follow-ups stay inside the department / place on the scope chip; 'overall' or the chip's ✕ clears it.
- In Kannada, Mitra answers in casual Kannada and you can interrupt it any time.
- Nothing invented: unknown places, departments or general questions get an honest 'not found' / 'not in my notes'.
- Before the demo, connect the office VPN (complaint understanding is weaker on the offline model without it).
